

FLIR Systems Installs Its EST Screening Solution at Pentagon to Support the Fight Against COVID-19

June 2, 2020

Latest Order Adds to \$100 Million in Thermal Camera Bookings During Q1 and Recent Purchase by General Motors for Workforce Skin Temperature Screening

ARLINGTON, Va.--(BUSINESS WIRE)--Jun. 2, 2020-- FLIR Systems, Inc. (NASDAQ: FLIR) announced it has installed its EST™ screening system at the Pentagon Visitor Center in Washington, D.C. The company's integrated EST screening solution, the A700 EST-IS, features the FLIR A700 thermal imaging camera. The system is being used to screen visitors for elevated or higher than expected skin temperatures, which can help guard against the spread of COVID-19.

The installation of its EST system at the Pentagon is one of many efforts FLIR is currently discussing with United States Department of Defense officials for applications across the armed services. The news follows statements made by FLIR President and CEO Jim Cannon on a recent earnings call that the company booked roughly \$100 million in new EST business in the first quarter of 2020. More recently, General Motors announced it will use FLIR cameras at many of its sites to screen workers in an effort to help prevent the spread of the novel coronavirus.

“For more than 40 years, FLIR has provided advanced thermal imaging technology to America’s military — on its aircraft, helicopters, ships at sea, and to forces on land,” said Cannon. “We’re honored to again serve the U.S. defense community in this effort to better protect visitors to the Pentagon and support elevated skin temperature screening.”

For applications in public buildings, hospitals, airports, schools, sports venues, or manufacturing, FLIR Systems’ EST cameras can be a first line of defense in managing the risks associated with a global pandemic. These groups and others are using FLIR thermal imaging cameras and software for the initial screening needed to help detect people with signs of elevated skin temperature. Once identified, those individuals can be checked with a medical device to determine if they have a fever, one of the symptoms of a coronavirus or other flu infection.

FLIR is the global leader in thermal cameras for temperature screening-related applications. Its technology has been employed worldwide by customers since the 2003 SARS epidemic, with unique functionality that includes advanced measurement tools and alarms to enable faster

Forward-Looking Statements

The statements in this release by Jim Cannon and the other statements in this release about the contract and order described above are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are based on current expectations,

estimates, and projections about FLIR's business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks and uncertainties that are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements due to numerous factors, including the following: the ability to manufacture and deliver the systems referenced in this release, changes in pricing of FLIR's products, changing demand for FLIR's products, product mix, the impact of competitive products and pricing, constraints on supplies of critical components, excess or shortage of production capacity, the ability of FLIR to manufacture and ship products in a timely manner, FLIR's continuing compliance with U.S. export control laws and regulations, and other risks discussed from time to time in FLIR's Securities and Exchange Commission filings and reports. In addition, such statements could be affected by general industry and market conditions and growth rates, and general domestic and international economic conditions. Such forward-looking statements speak only as of the date on which they are made and FLIR does not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date of this release, or for changes made to this document by wire services or Internet service providers.
